Setup & Integrations

Cron Job - required for the campaigns to run as per schedule

You need to setup cron as given below for every minute

Recommended

You need to add a single cron configuration entry to our server that runs the schedule:run command every minute.

cd /path-to-your-project && php artisan schedule:run >> /dev/null 2>&1	Copy

------ OR ------

wget -O - -q "https://whatsjet-demo.livelyworks.net/run-cron-schedule" --user-agent="cron" > /dev/null 2>&1	Copy

------ OR ------

Or you can find other ways on net to run cron job you need to access following url for the same.

https://whatsjet-demo.livelyworks.net/run-cron-schedule	Copy

Cron Setup: Mark as Done

Pusher - required for realtime updates
